REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art discloses a stator generator for an internal combustion engine having a rotor and a stator with layered and joined metal sheets which are stacked on one another so that the structural elements of the rotor and stator are preshaped. It is noted that the base claim now includes the allowable subject matter disclose in claim 24 that was pointed out in the Office Action sent on 08/12/03. More specifically, the prior art fails to disclose, in combination with the invention that the structural elements of the starter including a cooling system with a first cooling system are accommodated in an interior of the stator to provide internal cooling and a second cooling system with a part having pin bores and recesses on an outer edge of the stator for receiving cooling tubes for external cooling.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
